4. Change of work plan due to registration/accreditation procedure in Kazakhstan

Partners for a long time discussed the procedure for entering an educational program in the register and the accreditation procedure. KEEU and WKATU already have educational programs in the field of industrial automatization and robotics (KEEU - Automatization and Control, WKATU - Mechatronics). There are no such educational programs at INEU. In this regard, INEU must enter the educational program in the register in the first year of the project. The partners agreed with the accreditation stages indicated in the minutes of the meeting of the local committee.
